

## **History of Guinot**

L'Institut Guinot – Paris was founded by French biochemist Monsieur Guinot, who introduced a revolutionary professional skincare treatment – Cathiodermie – in the 1960s. It was the first facial to use mild galvanic current & high frequency currents to deep cleanse, ionise & oxygenate the skin. For the past 30 years, under the ownership of Jean Daniel Mondin, a doctor of pharmacology, the company has been at the forefront of advances in the beauty industry. Guinot was one of the first professional skincare companies to include the 'cellular life complex' in its skincare products. This complex of 56 vitamins, proteins & amino acids was developed in a hospital burns unit to help repair skin. Most recent innovations include the high performance anti-aging Age logic Cellulaire (the first professional skincare product to contain ATP) and the 'medicated cleansing' Microbiotic system to treat oily skin. Today, Guinot treatments and products are available in over 65 countries in the world.
